

CAN CAPITALISM SAVE THE PLANET?

Thursday 20 April 2023 (18:00)

Aula A – Aldo Rossi, Level 1, Building 11

Politecnico di Milano
via Ampère 2

A presentation by Alessio Terzi of his recent book “Growth for good: Reshaping capitalism to save humanity from climate catastrophe” (Harvard University Press, 2022).

The book addresses the most pressing issue facing humankind, which is what needs to be done to save the planet – or, more precisely, human life on the planet.

The author argues that it is possible (though far from easy) to harness capitalism’s “animal spirits”, through concerted action, in order to bring about sustainable and inclusive growth.

Alessio Terzi is an Economist at DG ECFIN, European Commission, and a Lecturer at HEC Paris and Sciences Po Lille.
